

Autonomic Relocates to New Headquarters, Expands Operation

Armonk, NY. June 21, 2012—Autonomic, supplying the custom electronics industry with award winning high performance cloud-based media solutions, has relocated to a new headquarters facility in Armonk, NY. The 8000 sq. ft. facility reflects Autonomic's growing market share, increased demand for the Mirage Media Server products and enables the company to expand operations and services including additional employees.

"The exponential growth in product shipments is driving the need to add support and administrative staff in order to maintain an exceptional level of service." reported Autonomic CEO and Co-Founder Michael de Nigris. "We also added a new assembly, service, and fulfillment center at the same location which will enable us to deliver product to our east coast dealers and Europe in a fraction of the time. Previously, all of our product shipments came out of our California facility, which will remain operational to service the west coast, Hawaii, Australia and Asia" de Nigris added.

In addition to manufacturing and fulfillment, the new facility includes more office space, a conference facility, a product demonstration and training room suitable for dealers and their

customers, a service center, dedicated technical support/customer service area and loading docks for shipping and receiving. "We are thrilled that our cloud-based media servers have become a go-to solution for a growing number of custom integrators and this new facility will best enable us to serve the CI channel and will allow us to continue to innovate and expand our product line" concluded de Nigris.

Autonomic Controls is currently hiring for open positions in administration, software engineering, customer support, control system programming, sales and product assembly. If you would like to apply for one of these positions, please visit www.autonomic-controls.com/careers for more information.

Autonomic Controls, Inc. (www.autonomic-controls.com) introduced the world's first cloud-based media server, making audio and video consumption more reliable, easy and fulfilling. Exclusively engineered for control system integration, Autonomic products have become the standard for converging content for multi-room distribution from the most popular sources, such as iTunes, Windows Media, Last.fm, PANDORA® internet radio, Rhapsody®, TuneIn Radio, SiriusXM Internet Radio and Spotify.
