

Autonomic Fields Eight Member Team to Cycle Against Multiple Sclerosis

Armonk, NY. July 11, 2011—Autonomic, supplying the custom electronics industry with premium cloud-based media server solutions, has announced that the company will sponsor a team to cycle in the battle against Multiple Sclerosis.

Team Autonomic will be participating in the Bike MS NYC fundraiser being held on October 2, 2011. Limited to a maximum of 5000 cyclists, Bike MS NYC offers participants the choice of three routes—30, 50, or 100 miles in length including traffic-free views of Manhattan, the Lincoln Tunnel and the George Washington Bridge. The objective is to race for a world free of Multiple Sclerosis, and Team Autonomic has set out to raise an inspired target of \$5000.

“We have formed a team for Bike MS NYC because the National Multiple Sclerosis Society funds more MS research than any other private organization,” commented Autonomic Co-founder, CEO and team captain Michael de Nigris. In addition to supporting studies which hope to reveal the cause and course of the disease, the National Multiple Sclerosis Society also provides much needed education, programs, and services to everyone who is affected by MS—including the diagnosed, their friends and families, and the healthcare professionals who work with them.

The number of people living with Multiple Sclerosis is on the rise, and the only way to put a stop to this malicious disease is to help researchers find a cure and free the world of MS. At this time, we can still only offer disease management drugs and therapies to the 400,000 people living with MS in America.

Team Autonomic encourages anyone interested in supporting this worthy cause to join the team as a participant or volunteer, make an [online donation](#) or send in a check. At the end of the race, we'll lift a glass with you under the Autonomic tent.
