

AUTONOMIC DELIVERS ARRAY OF NEW FEATURES FOR MIRAGE MUSIC PLAYERS

Improved sound quality for Sirius/XM users, Deezer compatibility, proprietary Snapshot function, enhanced playlist management and new synchronization software available now

Armonk, NY. November 12, 2014 – Autonomic, makers of the finest whole-house music systems, has announced the availability of an enhanced feature set for their MMS-2A and MMS-5A music players including compatibility with web-based music service Deezer, an amazing new Snapshot feature along with enhanced playlist management and new Mirage Media synchronization software for Windows.

The Mirage Music Players now deliver Sirius/XM at 256 Kbps, giving users more clarity and detail from their entertainment programming. The Mirage Music Players are engineered to deliver the highest possible fidelity from all sources, and this latest update for Sirius/XM users sounds superb. The rapid adoption of Sirius/XM at 256 Kbps is another example of Autonomic's ongoing commitment to deliver the highest quality playback capability to our customers.

Deezer helps broaden the Mirage Music Player's appeal internationally, with the service now available [in over 180 countries worldwide](#). The service also offers a sizable music library of roughly 30 million licensed tracks from many major and independent record labels as well as connectivity to over 30,000 radio channels. Availability to US consumers is coming soon.

Autonomic's new Snapshot feature enables users to create the ultimate music mix by capturing a Snapshot of their musical experience as it is happening and recall it at any time from their favorites menu. The mix can include a blend of locally stored digital music and streaming content, all elegantly sewn together in a customized queue by Autonomic's TuneBridge™ technology. Management of playlists has been enhanced as well, with fingertip control of advanced editing capabilities enabling users to swiftly delete, rename, reorder, add or edit content within their favorite playlists.

Designed to enhance efficiency for integrators, the new Mirage Media synchronization software for Windows mirrors the ergonomic advantages of the latest version designed for the Mac environment. The new software is faster and offers numerous configurability options. Additionally, integrators will benefit from an enhanced configuration page, which now allows them to assign, monitor and access servers in the field, monitor NAS drive scans, and gain real-time management capability via the Autonomic Dealer Zone Device Manager.

New Mirage Audio System packages available: Autonomic is now offering Mirage Audio System 2 or 5-stream base packs leveraging the MMS-2A and MMS-5A music players, giving integrators a complete range of high-resolution whole-house audio distribution systems. 16-zone packages start at \$499 per zone (\$7995 MSRP) with 4-Zone, 2-Stream packages as low as \$3,995 MSRP. All Mirage Audio System packages can be tailored to the exact needs of each customer and are expandable to 96 zones.

Autonomic Controls, Inc. (www.autonomic-controls.com) introduced the world's first cloud-based media server, making audio and video consumption more reliable, easy and fulfilling. Exclusively engineered for control system integration, Autonomic products have become the standard for converging content for multi-room distribution from the most popular sources, such as iTunes, Windows Media, PANDORA® internet radio, Rhapsody®, TuneIn Radio, SiriusXM Internet Radio, Slacker, Napster, Deezer and Spotify.

• Converge with a higher standard.
