

## **AUTONOMIC HIGH-PERFORMANCE MULTI-ZONE AMPLIFIERS NOW COMPATIBLE WITH AMX CONTROL PLATFORM**

### ***Autonomic AMX driver version 1.0 offers full per-zone control of Mirage Digital Amplifiers***

**Armonk, NY. February 6, 2015** – Autonomic, makers of the finest whole-house music systems, has announced the addition of a new AMX module, providing controllability between the AMX platform and Autonomic high-performance multi-zone Mirage digital amplifiers. Autonomic offers two whole-house amplifier solutions—one with outputs for four stereo zones (M-400) and the other with outputs for eight stereo zones (M-800). Both amplifiers deliver 100-Watts per zone. Mirage amplifiers also offer an array of source inputs (6 on the M-400, 8 on the M-800) and include extensive zone linking capabilities. In addition to connecting an Autonomic Mirage Music Player, the supplemental inputs enable easy integration of sources such as a cable or satellite set top box, CD player or other devices controllable within the AMX environment.

The new AMX driver version 1.0, available to authorized Autonomic integrators via download, offers full control over each amplifier's complete feature set per zone, from basic control of volume, mute, power, and source selection to advanced functionality such as maximum volume, mono/stereo selection, power-on volume, bass, treble, balance and other finite adjustments to ensure that each zone performs optimally. Both the M-400 and M-800 are engineered to maximize the enjoyment of music and other entertainment sources throughout a multi-room installation of any size up to an astonishing 96 zones. The renowned Mirage Music Players are the ultimate source of local and streaming music content and are engineered to work seamlessly with Mirage digital amplifiers and control platforms like AMX.

“The AMX module enables integrators to add Autonomic digital amplifiers to their tool chest of high performing digital amplification within AMX control environments,” explained Autonomic CEO Michael de Nigris. “Our Mirage amplifiers offer both superb sound and increased flexibility, making it easier for integrators to deliver the finest whole-house music systems,” added de Nigris.

The new module including documentation is available immediately to authorized integrators for download: [http://www.autonomic-controls.com/support\\_downloads.php](http://www.autonomic-controls.com/support_downloads.php)
