

FOR IMMEDIATE RELEASE

James Loudspeaker™ to Demo Premium Theater Featuring Auro 3D at 2015 CEDIA Booth #2805 in Dallas

Immersive demo room to feature key partners and highlight James Loudspeaker Mavericks premium theater speakers

Napa, CA, October 11th, 2015 – James Loudspeaker (www.jamesloudspeaker.com), designers and manufacturers of the highest quality décor-friendly entertainment products for both residential and commercial applications, will be offering a live immersive [Auro 3D](#) theater demo at 2015 CEDIA, Booth #2805. The demo will feature the company's [Mavericks](#) theater speakers and an impressive array of supporting components from participating manufacturers. In a separate alcove within Booth 2805, James will also be offering a demo featuring Dolby® Atmos™ and DTS:X using an array of Small Aperture architectural speakers, PowerPipe subwoofers and other exciting new products from James Loudspeaker—including a [brand new curved sound bar](#) to accommodate curved LED TVs and front projection screens.

The James Loudspeaker Mavericks theater speakers, developed for premium residential and commercial applications, are a large format hybrid horn system capable of ultra-high output and accurate reproduction of extreme dynamic transients. The Mavericks series provides ultra-wide bandwidth and very low distortion, making for a stunning cinema experience.

James Loudspeaker CEDIA Booth #2805 will feature an Auro 3D demo including the required “height” and “voice of God” layers that enable listeners to enjoy the immersive experience of the Auro 3D surround format. The James Loudspeaker Mavericks products for this setup include the MQ84A, a fully active L/C/R (featuring active crossover) for maximum control and efficiency, along with matching Mavericks surround speakers and subwoofers including the venerable M213, featuring three 21-inch transducers (one active with 5-inch voice coil) and two 21-inch passive radiators.

In a separate alcove, James Loudspeaker will feature another 3D surround demo utilizing Dolby Atmos and DTS:X. Playback will feature content in both formats including tracks from the latest [DTS:X](#) Tradeshow Disc. The Atmos/DTS:X alcove will utilize loudspeakers custom built for this application, showcasing James Loudspeakers' ability to accommodate unique form factors for integrators. There will also be an array of three subwoofers styles in the alcove, including the hideaway PowerPipe form factor located in the ceiling of the booth. Attendees can audition many of the James products and get an up close look at the quality and engineering of these Made in USA products.
