

## Autonomic Announces Complete ELAN Integration with Mirage Audio System

***Integrators can provide their clients with premium whole-house entertainment options for seamless operation within the ELAN control platform***

**Armonk, NY. June 14, 2016** – Autonomic, makers of the finest whole-house music systems, has announced compatibility between their complete Mirage Audio System (MAS) package inclusive of the award-winning Mirage Media Server (MMS) and Mirage Digital Amplifiers with the ELAN entertainment and control platform with the newly developed modules available for the Mirage Digital Amplifier models, M-800 and M-400. Based upon the development of easy-to-deploy drivers, ELAN's network of integrators now have the capability to offer their customers the finest whole-house entertainment solutions including access to all popular streaming services and high-resolution audio playback in up to 16 zones.

Within the ELAN control environment for iOS and Android devices, users can seamlessly connect to the Mirage Media Server or Mirage Audio System to browse content by album, artist, titles or favorites, create custom playlists and take advantage of TuneBridge®, an Autonomic exclusive feature that enables each user to uniquely tailor their programming selections—all within an app that is responsive and easy to use. The newest module for Mirage digital amplifiers enables users to route any source to any zone and control volume/bass/treble/balance within each zone as well. This is the whole-house entertainment functionality that consumers are seeking in today's smart home marketplace, and Autonomic integration with the ELAN platform creates an opportunity for integrators to deliver premium performance to their customers. Autonomic products are only available through the custom integration channel, providing dealers with a profitable and versatile lineup of entertainment components from a company renowned for customer service and support.

"Integration with ELAN is another opportunity for Autonomic to support the custom installation community with the finest whole-house entertainment solutions—and making our Mirage Audio System compatible with this popular control platform brings critical profit opportunity and enhanced efficiency to integrators," explained Autonomic CEO Michael de Nigris.

Mirage Amplifier drivers are now available in the ELAN Dealer site alongside the existing MMS drivers.
