## Access Networks Unveils Unity 8G+ Residential Network Solution

*Improved wireless performance and throughput speeds along with more wireless access points/PoE port availability deliver increased versatility for residential integrators*

Encino, CA, June 30, 2016 – Access Networks ([accessca.com](http://accessca.com)), the premier provider of enterprise-grade network solutions for residential integration, has introduced the Unity 8G+, a complete premium network package sold only through professional integrators. The Unity 8G+ features advanced performance and security enhancements including an ASA firewall, a 12-port core switch, a 48-port layer 2 switch and upgraded 802.11ac access points. All Access Networks solutions are tailored for each specific home in order to ensure easy deployment and flawless performance. The Unity 8G+ is available now with an MSRP of \$23,335.

The Access Networks Unity 8G+ is a highly sophisticated, fast and secure home networking solution featuring the latest in enterprise-grade networking hardware, custom-designed and programmed to meet the individual needs of each project. This powerful network has been engineered for medium to large scale projects, anticipating heavy video streaming activity and other latency-sensitive applications. With pre-configured VLANs, Gigabit routing, and QoS traffic prioritization, the Unity 8G+ will seamlessly support even the most complex automated residence. Based on a 12-port layer 3 core providing more available PoE ports, the advanced security and threat protection of an ASA firewall and blazingly fast ISP throughput (multi-protocol testing of 300Mbps and Speedtest.net testing of over 500 Mbps), the Unity 8G+ gives integrators the robust residential networking platform they require to meet the demands of discerning clients. With enhanced security features, the Unity 8G+ provides peace of mind both now and in the future. The Unity 8G+ delivers superb wireless performance utilizing Ruckus 3x3:3 802.11ac access points and a single touch-point wireless controller along with the scalability to address an ever-evolving wireless environment. Triple-stream 802.11ac access points offer 1000+ dynamic beam patterns for instant bandwidth delivery and premium wireless coverage. Patented antenna technology steers the wireless signals to high-quality paths maximizing wireless throughput.

“Everything in this new Unity package arrives pre-configured and ready for deployment,” explained Access Networks Founder & CEO Hagai Feiner. “Integrators rely on Access Networks for complete, fine-tuned and highly efficient solutions like the Unity 8G+. Our design, programming and technical support services give integrators the networking resources they must have in order to deliver the fast and secure connected environment that their clients demand,” Feiner added.
