

FOR IMMEDIATE RELEASE

AudioControl DM-810 Processor Now Shipping to Dealers Worldwide

This premium DSP matrix processor delivers precise system calibration and tuning capabilities of automotive sound systems using either a factory or aftermarket head unit

Seattle, WA, November 18th, 2016 – AudioControl (audiocontrol.com), makers of innovative high-performance audio solutions for the residential, commercial and automotive markets is now shipping the DM-810 DSP matrix processor for automotive sound systems to dealers worldwide. The DM-810 gives installers a revolutionary user interface, greatly simplifying the process of optimizing system performance and delivering the finest automotive sound to consumers.

The AudioControl DM-810, designed, engineered and manufactured in the USA, features AudioControl's new DSP software platform, delivering its new 'Smart-user' interface ergonomically designed to dramatically simplify the user experience for installers. AudioControl's intuitive DSP PC interface is packed full of features including 30-bands of EQ adjustment, parametric filters, signal time-alignment, input delay, phase correction, patented AudioControl AccuBASS™, GTO turn on circuit as well as integrated input and output Real Time Analyzers (RTA's). The DM-810 also incorporates a connectivity port that will allow users to program DSP features using Android or iOS devices, as well as stream media including high-quality audio via an optional AudioControl Bluetooth device.

The DM-810 has eight active high-level speaker inputs, six pre-amp inputs, and two digital inputs plus ten pre-amp outputs.

"Our customers have been asking for a powerful DSP-based processor that can accommodate both factory and aftermarket interface scenarios, and we are thrilled to be delivering that solution now," commented Chris Bennett, AudioControl's National Sales Manager of Mobile Electronics.

The AudioControl DM-810 also features a 5-year warranty. Suggested price is \$699.00
