

FOR IMMEDIATE RELEASE

SAVANT® TRUEIMAGE WINS CE PRO BEST AWARD AT THE 2017 CEDIA EXPO

Reimagined TrueImage™ shines, forever changing the way homeowners interact with their smart home ecosystem

HYANNIS, MASS. — September 19th, 2017 — Savant, a leader in smart home technology, has won a CE Pro BEST award at the recent 2017 CEDIA Expo in San Diego, CA. This award recognizes Savant for contributing significant innovation to the luxury smart home market.

Savant TrueImage has been honored as best user interface with a 2017 CE Pro BEST Award. CE Pro BEST Awards recognize the most noteworthy new products and technologies. All 179 entries were judged on innovation, functionality, competitive advantages and benefits to the installer by a dozen credible industry leaders, along with the editors of CE Pro.

TrueImage is a unique virtual lighting control app for smart homes available on the market today and leverages Savant's LED smart bulb mesh technology, allowing users to visually simulate the status of each light fixture in any room on their iOS or Android mobile devices. Users can easily change dimming levels and RGB colors simply by tapping the virtual light. TrueImage greatly reduces the complexity associated with current smart lighting systems and transforms the home automation experience to a more intuitive level for all users. The TrueImage virtual experience also works with Savant touch screens and the Savant Pro Remote, enabling users to see, touch, control and dim their Savant lighting directly from the photographic image, updating the color and dimness setting of the light as a visual reference on the interface screen in real time. The intuitiveness and cool factor of Savant TrueImage will help integrators generate excitement during the sales process and deliver an experience their clients will adore.

“Savant is honored to have been acknowledged with this award for innovations that we have brought to the smart home space,” stated Savant CEO Robert Madonna. “TrueImage is unlike any other control solution and we are excited to provide our network of integrators with such a powerful tool they can use to differentiate themselves when presenting smart home solutions to their prospective clients.”
