

FOR IMMEDIATE RELEASE

## SAVANT® INTRODUCES NEW LINEUP OF WALL MOUNTED DEDICATED TOUCH SCREENS

*New screens deliver best-in-class user interface from an array of décor-friendly sizes and colors*

**HYANNIS, MASS. — June 6<sup>th</sup>, 2017** — Savant, a leader in smart home technology, has announced today the introduction of Savant Touch—a family of dedicated touch screens for intuitive access to smart home features. The Savant Touch lineup has been designed to blend seamlessly into any décor while placing climate, lighting, entertainment and more at the fingertips of the homeowner as well as the groundbreaking Savant Scenes technology that personalizes the smart home experience for each user.

The Savant Touch product line includes high-resolution color touch screens utilizing technology from Savant’s award-winning Pro Remote. Savant Touch can easily control integrated climate, advanced lighting, entertainment and activation of Savant Scenes to give users the luxury and convenience of smart home control from a small, in-wall form factor. These touch screens utilize a presence sensor to activate them automatically as a person approaches, making them effortless to use.

The first Savant Touch product to be available is a single gang 5.5-inch touch screen (with 2.9-inch and 8-inch versions to follow later in the year) that delivers complete home control and stunning high-resolution graphics. For Integrators, the Savant Touch product line is simple to install, fitting in a traditional single gang enclosure and low voltage powered using Power over Ethernet (POE 802.3af).

“Our network of integrators has reported a growing demand for dedicated touch screens in an array of sizes,” stated Savant CEO Robert Madonna. “Our premium lineup of touch screens gives homeowners an ideal solution for any décor or application while leveraging Savant’s class-leading user interface to bring the best control experience to any room in the home.”

Savant touch screens are available in white or black and will begin shipping in June, 2017.
