

FOR IMMEDIATE RELEASE

James Loudspeaker™ Joins the Cinema Designer Database

The Cinema Designer home theater design tool enables integrators to quickly and easily generate a standards-based set of drawings with performance projections that they can present to clients or prospects

Napa, CA, December 1st, 2017 – James Loudspeaker (www.jamesloudspeaker.com), designers and manufacturers of the highest quality décor-friendly entertainment products for both residential and commercial applications, has joined The Cinema Designer (TCD) manufacturer database, enabling any James Loudspeaker authorized home cinema installer, designer, dealer or distributor anywhere in the world to utilize the TCD tool in support of their theater designs. The TCD software helps integrators efficiently design standards-based home cinemas and media rooms using James Loudspeaker theater components.

How The Cinema Designer Benefits Dealers/Integrators

TCD is a CEDIA award-winning cloud-based tool that enables dealers to design a dedicated cinema or media room easily and efficiently. TCD allows users to create technically correct theater designs, support documents and aesthetic renders including a 3D CAD drawing. TCD is available to users all over the world and provides all relevant documentation for theatre design, including audio and video calibration reports.

James Loudspeaker Products in TCD

The James Loudspeaker models included in the TCD design tool are the OW Series, QX Series, BE Series, Mavericks Series, EMB II Series and the PowerPipe Series of loudspeakers and subwoofers, as well as the M1000 mono subwoofer amplifier.

“We are pleased to have joined TCD and support their ability to increase operational efficiency for our dealers and integrators, who are creating some of the finest home theater systems in the world,” stated Keith Parke, National Sales Director at James Loudspeaker.

Inquiries about TCD membership (www.thecinemadesigner.com) and/or available free training webinars should be directed to Alice Gustafson at: alice@thecinemadesigner.com
