

FOR IMMEDIATE RELEASE

## AudioControl to Debut Commercial Audio Solutions at InfoComm 2018

*AudioControl's award-winning DSP and matrixing functionality to be showcased in ultimate 70-volt amplifier solutions*

Seattle, WA, May 30<sup>th</sup>, 2018 – AudioControl ([audiocontrol.com](http://audiocontrol.com)), makers of innovative high-performance audio solutions for the residential, commercial and automotive markets for over 40 years has cemented their commitment to commercial A/V integrators by exhibiting for the first time at InfoComm 2018 (**Booth N3139**) with a brand new lineup of advanced 70-volt amplifiers. These new dual-mode amplifiers, which will run both high and low-impedance speaker systems, utilize the company's award-winning DSP amplifier platform that enable integrators to fine-tune the sound to match nearly any acoustic environment.

“AudioControl has been expanding into commercial markets and as demand for our solutions has increased sharply, we decided that the timing was right to exhibit at InfoComm 2018,” stated CEO Alex Camara. “We are very much looking forward to productive meetings with A/V integrators, independent reps and other show attendees in booth N3139.”

AudioControl has announced the introduction of three highly versatile Made in USA 70-volt amplifiers that enable integrators to deliver superior quality entertainment content through a large number of speakers connected to each output. These new amplifiers are unique in the realm of 70-volt options because they offer the DSP control and signal matrixing capabilities developed by AudioControl for their award-winning Director Series amplifiers. These key features enable integrators to precisely tailor the sound by zone to any environment—from Houses of Worship, Boardrooms, Hospitality, Collaboration Suites and more.

### **Always There For Integrators**

AudioControl has a 40-plus year history of creating award-winning products for integrators and backing them up with superior customer service as well as a 5-year warranty. Engineered and manufactured in the Pacific Northwest, the CM4-700 is yet another example of a best-in-class product design from AudioControl.

The AudioControl CM4-700 has a suggested client price of \$2600 USD and will become later in 2018.
