

FOR IMMEDIATE RELEASE

SAVANT® PARTNERS WITH USAI® LIGHTING TO DELIVER NEXT GENERATION LED LIGHTING EXPERIENCE

Combining the power of Savant Scenes and Truelmage compatibility with USAI Lighting's color-changing technology to deliver industry-leading personalization and wellness

HYANNIS, MASS. — May 8th, 2018 — Savant, a leader in smart home technology, has announced today an exciting partnership with USAI Lighting, an award-winning manufacturer of sophisticated architectural light fixtures for nearly any application. USAI Lighting's innovative LED solutions focus on achieving the perfect balance between color technology, optical design and superior performance.

In both joint product design and market initiatives, Savant and USAI Lighting will provide integrators with seamless end-to-end lighting solutions that both solve the compatibility issues integrators face with disparate solutions and deliver an unmatched control experience via Savant's astonishing Truelmage user interface. Savant integrators will be able to offer their clients a wide selection of residentially focused USAI Lighting fixtures from six unique, popular product families encompassing hundreds of fixture options. Savant and USAI Lighting will be providing online project design, ordering tools and other support services for integrators as part of this initiative.

Savant Truelmage

The collaboration between Savant and USAI Lighting represents a huge leap forward in how tunable white and WRGB lighting can be configured and controlled. Savant's Truelmage has forever changed the way homeowners interact with their lighting, allowing users to experience virtual lights in any room from photographs taken and stored on their mobile devices. Users can easily change dimming levels, kelvin temperatures and WRGB colors from their phone, tablet, Savant touch screens and Pro Remote as well as Savant Scene access via voice command. Savant and USAI Lighting will be utilizing Savant's scene engine and USAI Lighting's color research to serve up pre-defined light color and scene content that can be implemented as is or easily adjusted based on personal preference and project design.

Wellness and Circadian Rhythm

Light regulates many biological responses, including an 'internal clock' that heightens alertness during the day and makes us sleepy at night. The daily changes in our physical, mental and behavioral states that respond to a light-and-dark cycle are commonly known as our circadian rhythm. Mimicking this natural rhythm indoors optimizes circadian health and overall wellness by delivering the proper color and intensity of light to align correctly with time of day.

USAI Lighting's tunable white light and WRGB technologies, combined with Savant's intelligent automation will allow lights to not only be set to certain levels and color temperatures based on executed scenes, but also allow for a single room or even the whole home to be put into a default circadian rhythm mode mitigating circadian disruption and promoting wellness.

"Our partnership with USAI Lighting represents another vital piece of Savant's forward-thinking strategy that includes lighting, climate, energy management, entertainment and a broad range of smart home

functionality,” stated Savant CEO Robert Madonna. “Savant enables these advanced technologies to work effortlessly together, providing enhanced lifestyle, environmental responsibility and wellness for the luxury home.”

“The combination of Savant and USAI Lighting’s advanced controls and lighting technology provides an intuitive way for homeowners to experience the power of personalized lighting—light that is as dynamic and ever-changing as we are,” said Bonnie Littman, President and CEO of USAI Lighting. “For the first time ever, homeowners can curate their lighting for any activity, whether it’s for better living, working or playing, and we are thrilled to partner with Savant, bringing this experience to the market in a high-quality and meaningful way.”
