

**FOR IMMEDIATE RELEASE**

## **LumaStream Introduces the Quadrallux EP22 Ultra Low Profile LED Fixture**

*Designed to be recessed into standard grid ceilings or suspended via cable, the Quadrallux EP22 delivers dimmable, uniform illumination for nearly any application*

**Saint Petersburg, FL August 9<sup>th</sup>, 2018** – LumaStream ([lumastream.com](http://lumastream.com)), makers of innovative, premium low-voltage LED lighting systems for residential and commercial applications has introduced the Quadrallux EP22, an ultra-low profile 2' x 2' (2-foot by 2-foot) fixture that can be recessed into standard grid ceilings or suspended via cable. Featuring a sturdy aluminum frame, the Quadrallux EP22 is also available in 1' X 4' and 2' X 4' form factors.

### **Premium Solution for Commercial Applications**

Ideal for an array of commercial lighting applications where a premium solution is paramount, the Quadrallux EP22 will provide uniform illumination that maximizes visual comfort and efficiency leveraging LumaStream's edge lit technology. Approved for use in wet locations, the fixture is an astonishingly slender ½-inch in depth and provides integral seismic clips to secure the fixture into a grid ceiling. The dimming control, power conversion, and constant current drivers for multiple fixtures are housed in a remote DC, Class 2 intelligent power supply, which can be located up to 150-feet from the fixture. The Quadrallux EP22 can be made to order with output to 6000 lumens, a wide array of color temperatures and with a CRI of 80+ or 90+, offering superb efficiency at 120 lumens per watt and faultless dimming down to .2%.

The LumaStream Quadrallux EP22 has been engineered to work with the same power supply as the company's popular downlight and conference room fixtures, giving lighting designers and integrators access to the most efficient "turnkey" complete lighting solution for their clients. Each power supply output is individually addressable, enabling integrators to program scenes such as ON, OFF, PRESENTATION or other, and easily interface with their control platform of choice. Because the Quadrallux EP22 uses LumaStream's patented remote driver technology, the cool-running, energy efficient fixture is an ideal solution for an array of commercial applications of any size.

### **Engineered for Integrators**

With LumaStream, integrators have full control over an end-to-end, architectural LED lighting solution that is modern and energy-efficient without the need to be dependent on a licensed electrician. LumaStream's LED lighting solutions are based on patented technology that enables smooth, faultless dimming as well as the distribution of low-voltage DC over long distances between remote power supplies and premium light fixtures without any degradation in performance. Featuring fully scalable power supplies available in DMX or 0-10 volt configurations with up to 12 channels, the LumaStream lighting platform runs cooler and performs to specification longer than competitive LED lighting solutions. Most critically, LumaStream supports their integration partners with comprehensive lighting design services as well as technical and sales support teams, giving them access to high-level expertise and a pathway to success in the lighting category.

### **About LumaStream**

LumaStream was founded in 2010 and has become an industry leader in low-voltage, specification-grade, high CRI white light LED lighting solutions for commercial and residential applications. Having been awarded over 20 patents for significant innovations, LumaStream's unique digital power conversion platform has revolutionized the lighting industry and made premium LED solutions practical for nearly any application. Featuring an open-source control protocol compatible with all popular automation systems, class-leading energy efficiency and smooth, continual dimming to less than 1%, LumaStream is also best-in-class for reliability and longevity. Headquartered in Saint Petersburg, Florida, LumaStream offers products that are proudly made in USA. [lumastream.com](http://lumastream.com)
