Seattle, WA, May 20th, 2019 – AudioControl (audiocontrol.com), makers of innovative high-performance audio solutions for the residential, commercial and automotive markets will be exhibiting with Studio Six Digital at InfoComm on June 12-14 in Orlando, FL next month. AudioControl acquired interest in Studio Six Digital in 2018 and is excited to showcase these industry-leading audio test and measurement tools alongside new AudioControl products in booth 5160. AudioControl is the exclusive distributor of Studio Six products in the United States and over 20 countries globally.

Studio Six Digital was founded over ten years ago and is based in Santa Cruz, CA. The company's success has been based on the software and hardware designs of founder Andrew Smith, and Studio Six Digital has garnered a large following of loyal customers around the world. Studio Six provides innovative microphones, audio interfaces, apps and software to audio testing and measurement professionals that serve markets such as recording studios, concert halls, houses of worship, commercial cinema, automotive and many more. Studio Six will be showcasing several new products at InfoComm including a USB test microphone featuring an audio output on the bottom of the mic along with other advances and surprise announcements.

"We are thrilled that Studio Six is now an AudioControl company enabling us to continue our highly productive work together," stated AudioControl CEO Alex Camara. "We look forward to broadening the reach of Studio Six innovations, providing commercial A/V integrators with the ability to efficiently analyze and calibrate any space to achieve optimized sound."

AudioControl at InfoComm 2019

AudioControl will be highlighting three exciting new product categories designed for commercial A/V integrators at InfoComm. AudioControl's lineup of three 70-volt amplifiers offer performance, build quality and features unavailable on competitive solutions. The company's brand new Avalon G4 is the most versatile 4/3/2 channel configurable amplifier on the market, ideal for nearly any entertainment application. And the new DM-RTA enables integrators to perfectly calibrate audio system performance even in the most challenging acoustic environments. These offerings from AudioControl along with hardware and software solutions form Studio Six make InfoComm Booth 5160 must-see for all show attendees.
