

FOR IMMEDIATE RELEASE

Audio Physic to Unveil the Midex and Classic 25 Loudspeakers at 2019 Munich High End Show This Week

VANA Ltd. to bring these exciting new high-performance loudspeakers to consumers in the US market

(Lake Grove, NY) May 8th, 2019 – VANA, Ltd. (www.vanaltd.com) has announced that Audio Physic will be introducing the Midex and Classic 25 Loudspeakers this week at the 2019 Munich High End show, where they will be exhibiting **May 9-12 in Room A4.1 F125.**

Audio Physic Midex

The Audio Physic MIDEX uses our tried-and-tested Sandwich Cabinet that looks gorgeous and cancels out any sound colorations. The enclosure has internal reinforcements made from open cell Ceramic Foam, uses the new Honeycomb material first utilized in the STRUCTURE and features our latest driver technology. The result is an extremely neutral and detailed loudspeaker.

Audio Physic Classic 25

The Audio Physic Classic 25 shares many technical features with our larger models, such as the Dual Basket Drivers and the invisible woofer inside the cabinet. The cabinet itself is our famous Glass-Sandwich construction, which subdues sound radiation from the enclosure while looking great at the same time. All this effort pays off, as the CLASSIC 25 rewards with natural, open performance that allows any kind of music to sound its best.

PLEASE VISIT AUDIO PHYSIC AT THE 2019 MUNICH HIGH END May 9-12 Room A4.1 F125
