

FOR IMMEDIATE RELEASE

Savant® and Racepoint Energy Partner to Showcase PoE Lighting Solutions at Lightfair 2019

HYANNIS, MASS. May 23rd, 2019 — Savant, a leader in smart home technology, alongside Racepoint Energy, is showcasing new PoE lighting solutions (Power over Ethernet), including two new ControlDirect PoE LED drivers and easy-to-use, set up and configurations tools. PoE lighting solutions deliver the benefit of single-wire installation, IP control and direct BLE communication (Bluetooth Low Energy), creating the most compelling new technology the lighting industry has seen in years.

PoE Drivers Built for Today's Technology Platforms

The Racepoint ControlDirect PoE LED drivers include a single channel 10-watt driver designed for compatibility with classic white LED lighting and a four-channel WRGB 50-watt driver. The BLE communication feature delivers a direct path to both configure and control the LED, enabling a technician to bypass the control system and communicate directly to the fixture (even without being on the network), helping to both speed up the on-boarding and configuration process but also to quickly isolate any issues once fixtures have been installed.

Quick Configuration Toolkit from Savant

The Racepoint ControlDirect LED drivers paired with Savant's standalone TrueImage Lighting app can be quickly and easily configured, including load grouping, color temperature settings and more. Lighting loads can be easily grouped and regrouped depending on changes in the residential or commercial environment; great for ever-changing dynamic spaces such as hospitality ballrooms, meeting spaces and lobby or presentation environments.

The Savant Lighting TrueImage app also delivers a full featured control experience that includes scene configuration, color temperature and light shows.

For more information on Savant, visit Savant and Racepoint Energy at Lightfair, Booth 2025 or contact us at lighting@savant.com.
