

FOR IMMEDIATE RELEASE

Savant's No-Compromise Shade Offerings Deliver Elegant Solutions for Every Project

Savant Shades deliver uncompromising aesthetics for both new construction and retrofit projects, including wired and wireless options featuring the same sophisticated, minimalist appearance

HYANNIS, MASS. August 13th, 2019 — Savant®, a leader in smart home technology, has expanded their shade offerings to include both battery-powered motor solutions as well as new quiet, high-powered wired motors. Unlike bulky, unsightly motorized shades, all Savant wired or wireless solutions fit into the same low-profile tube and bracketing system, giving integrators a no-compromise window treatment for both new construction and retrofit applications.

Motorized Shade Revolution

Savant's advanced shading options enable integrators to sell design first, confident that whichever motor technology suits the application, the finished product will look fantastic in the home. For retrofit projects, Savant's new rechargeable battery-powered motors install into the same high quality JGeiger bracketing system as the wired solution and are available with over 400 fabric choices with sheer, translucent and blackout options. Savant Shades can be controlled within the Savant smart home ecosystem via the Pro Remote and Savant Pro App, locally or remotely.

The Perfect Combination of Silent and Powerful

Savant's latest shading solutions also deliver higher-power motors that effortlessly support large window walls yet raise and lower to a barely audible whisper. Integrators will appreciate that the new motors connect to Savant's low-voltage power enclosure that easily manages power supplies for both low-voltage keypads and shades.

Brackets for Every Project

Savant offers multiple bracket styles to accommodate any installation. Design-first exposed roller brackets are available in both inside/jamb mount and floating/outside mount styles, and can be ordered in different finishes – White, Black, Black Aluminum and Silver Aluminum. Additionally, Savant offers basic pocket bracket kits that can be used in both a traditional hidden pocket installation or as part of Savant's Negative Reveal Pocket Kits.

Testimonial

Savant's new shading solutions raise the bar in the luxury shading market. Whether the shades are wired or wireless, the finished installation is visually unparalleled. The look and performance is without par.
