

FOR IMMEDIATE RELEASE

## The Latest Release from Savant® Brings User Personalization to the Savant Pro Remote

*Savant's Pro Remote touchscreen can now be personalized by the user for quick access to Savant Scenes, Favorite Channels and commonly used services, plus the Microphone button can now be configured for Siri voice control*

**HYANNIS, MASS. August 15<sup>th</sup>, 2019** — Savant, a leader in smart home technology, has enhanced their award-winning remote control experience, enabling users to personalize each Pro Remote by room or by user. In addition to touchscreen personalization, the Pro Remote's native voice button can also be configured for Siri voice activation.

### The Savant Pro Remote

Unlike any other user experience, the Savant Pro Remote is the most intuitive interface for entertainment systems and smart home functionality, featuring an app-driven platform and the perfect blend of hard buttons, touchscreen interface and voice control. With the latest release from Savant, users can now select from all available Savant Scenes, Services and Favorite Channels and add the ones they use the most frequently to the home screen for effortless access. Users can set up a home screen that is particular to the functionality of each room or create a home screen that is specific to each user, providing the most intuitive smart home control experience imaginable.

### Voice Control for Even the Most Security-Conscious Clients

Having already delivered native integrations with Google Home and Amazon Alexa voice assistants to the Savant platform, users will now have access to Siri-based voice control of Apple TV using the Savant Pro Remote. By pushing the microphone button, Savant users can now simply ask Siri to find a movie, an album, an artist, a playlist, streaming services and more. This user-activated approach allows integrators to deliver the convenience of voice command functionality to clients who prefer the security of a voice agent that is not always listening.

### Testimonial

*"The new Savant Pro Remote Home Screen update is fantastic. It is simple to set up custom profiles and I love the fact that we can easily re-order Favorite Channels, Scenes and Services directly from the remote's Home Screen."* Eli Weinkle, NXT AV, Irvine, California.

New Savant Pro Remote features are available now.
