

FOR IMMEDIATE RELEASE

AudioControl Introduces RS Series Subwoofer Amplifiers with DSP

Lineup includes two models designed to deliver astonishing power along with DSP tuning capabilities for the ultimate in extended, seamless bass response

Seattle, WA, September 5th, 2019 – AudioControl (audiocontrol.com), designers and manufacturers of innovative high-performance audio solutions for the residential, commercial and automotive markets has introduced two RS Series single-channel subwoofer amplifiers ideally suited for home theater, 2-channel music systems and multi-zone audio applications. Both amplifiers feature AudioControl's popular DSP feature set, providing integrators with the ultimate resource for fine-tuning each system. AudioControl RS Series amplifiers will become available Q4, 2019.

The Ultimate Subwoofer Amplifiers

The AudioControl RS 1000 and RS 500 are the ultimate bass amplification solutions for any home cinema, multi-zone audio or 2-channel music system. The RS 1000 delivers 1000 watts from a 2U chassis into a 4 or 8-Ohm subwoofer, and the RS 500 delivers 500 watts from a 1U chassis into a 4 or 8-Ohm subwoofer. Both RS Series amplifiers deliver the ultimate control of any subwoofer system thanks to high power and rock solid stability, even into 2 ohms. Like many AudioControl products, RS Series subwoofer amplifiers accommodate the needs of integrators with IP and IR control as well as loop outputs with an optional high-pass filter along with a balanced and unbalanced input. These features, coupled with the limitless adjustability of AudioControl's multi-award-winning DSP engine that puts graphic and parametric EQs, a crossover along with delay and phase controls at easy access for precise calibration and tuning, make the RS Series amplifiers a definitive choice to power any subwoofer in entertainment systems that demand the very best.

"We have had numerous requests from integrators all around the world for an AudioControl subwoofer amplifier solution and we are so proud of the engineering and execution behind these two new models," explained AudioControl CEO Alex Camara. "We are very confident that the RS Series, featuring an elegant industrial design that matches our new G4 Series amplifiers, will provide integrators with the most complete solution set ever from AudioControl."

Always There for Integrators with the Finest Solutions Available

AudioControl has a 40-plus year history of creating award-winning Made in USA products for integrators and backing them up with superior customer service as well as a 5-year warranty. Engineered and manufactured in the Pacific Northwest, RS Series subwoofer amplifiers are yet another example of a best-in-class, innovative product design from AudioControl.
