

FOR IMMEDIATE RELEASE

Amina Offering Seminar at Tech X Design Presented by CEDIA

Huntingdon, UK October 1st, 2020 – Amina (aminasound.com), the leader in high-performance invisible sound, has announced that they are participating in the Tech X Design virtual event on October 6th. The seminar offered by Amina will address best practices for specifying invisible loudspeakers both for new construction and retrofit applications. The **‘Understanding and Specifying Invisible Sound Solutions’** presentation will take place on October 6th at 11:15 AM BST. [REGISTER HERE](#)

‘Understanding and Specifying Invisible Sound Solutions’

Presented by Amina, this seminar explores the options available to architects and interior designers seeking to include premium entertainment solutions within their projects. Advanced invisible loudspeaker technologies such as the Edge and Mobius product lines from Amina are capable of delivering superior quality audio playback for numerous applications with zero visual intrusion into the look and feel of the space. Invisible loudspeakers are ideal for modern minimalist or historic properties in both residential and commercial markets, and represent an important opportunity to satisfy discerning clients with a beautiful, high-performance solution. Amina’s Invisible speakers can be installed within sheetrock, plaster or millwork, and finished with a host of materials such as stucco, plaster, natural and man-made veneers such as laminate, wood, leather, sheet slate or even concrete.

Topics to be covered include:

- What is Distributed Mode Loudspeaker technology (DML)
- Acoustical and aesthetic benefits of DML technology
- Integration of invisible sound solutions into new properties
- Integration of invisible sound solutions into historic properties
- Examples of residential and commercial applications

TECH X DESIGN presented by CEDIA is a free multi-association approved virtual event for the design community. This global education summit will feature a full schedule of CEU/CPD courses and panel sessions that will focus on technology and its impact on the design community.
