## AudioControl Introduces Powerful 5-Channel 1300 Watt Amplifiers

*Available with or without onboard DSP delivering 1300 Watts total system power from a single chassis, AudioControl's new 5-channel amps ideal for complete aftermarket systems or OEM upgrade applications*

Seattle, WA, February 1<sup>st</sup>, 2021 – AudioControl ([audiocontrol.com](http://audiocontrol.com)) has introduced two new high-power 5-channel amplifiers capable of driving the front, rear and subwoofer channels of a complete premium audio system solution. Having all five channels housed within a single chassis enhances installation efficiency, providing 12-volt specialists with solutions that deliver the features and performance consumers demand.

AudioControl's new 5-channel amplifiers offer 200 Watts RMS X4 @ 2-Ohm (100 Watts X4-channels RMS @ 4-Ohm) and 500 watts X1-channel at 2-Ohm along with eight speaker level inputs with selectable summing capability. The D-5.1300 delivers onboard DSP control of all amplified outputs and a pair of low-level outputs as well. The DSP interface is managed by the highly intuitive DM Smart App designed for all of AudioControl's DSP amplifiers. The LC-5.1300 offers the same outstanding specifications and performance without the DSP features. The AudioControl D-5.1300 has a selling price of \$1,099. The LC-5.1300 has a selling price of \$799.

"Our new 5-channel amplifiers offer outstanding performance for many system applications, all from a sleek, single-chassis solution," stated Chris Bennett, Director of Mobile Audio at AudioControl. "The flexible input stage accommodates the growing OEM integration market, and DSP on the D-5.1300 enables 12-volt specialists to perfectly tune each system to match the preferences of individual clients. These amplifiers represent an important opportunity for our dealers."

**AudioControl LC Series 5-channel amplifiers are available now**

**AudioControl D Series 5-channel amplifiers will begin shipping mid-February, 2021**
