

FOR IMMEDIATE RELEASE

Bryston BR-20 Preamp Bit-Perfect High-Resolution Streamer Receives Roon Ready Certification

The Roon experience enables music lovers to browse, organize, and listen to music with effortless access to artist photos, credits, bios, reviews, lyrics, tour dates, and more

Peterborough, Ontario April 13th, 2022 – Bryston (bryston.com), a leading manufacturer of ultimate-performance audio electronics and loudspeakers for music and cinema systems available through the finest dealers worldwide, has announced that the BR-20 preamp/bit-perfect high-resolution streamer is now Roon Ready certified.

“Bryston is excited to enhance the user experience of the BR-20 by offering access to Roon functionality,” said Dave Kakenmaster, Director of Sales, US at Bryston. “The BR-20 delivers performance unlike any other audiophile preamp/streamer, and the story becomes even more compelling with the addition of Roon certification.”

Roon Functionality

BR-20 users can now enjoy the Roon experience, an engaging way to browse, organize, and listen to music. Artist photos, credits, bios, reviews, lyrics, tour dates, and composers are located automatically, then interconnected by links to build a surfable digital magazine. Roon runs on most Mac, Windows, and Linux PCs, or on other products that include Roon Core. The Bryston BR-20 will automatically discover and connect to Roon without any configuration, creating the ultimate user experience for the music enthusiast.

The Bryston BR-20 combines a highly advanced analog preamp with the company’s flagship digital-to-analog conversion (DAC) platform and a high-performance streaming music player to create an ultimate performance audiophile hub.

The Roon Ready Bryston BR-20 preamp/streamer is available now.

About Bryston: Bryston (bryston.com) began designing and manufacturing highly accurate, innately reliable audio amplification in the early 1970s. Since that time, Bryston has become legendary for hand-built quality, superb performance and dependability, utilizing precision manufacturing techniques and materials more typically found in military and aerospace applications. Bryston amplifiers have been selected by some of the most renowned recording studios and discerning music professionals. Acquired in 2021 by James Tanner in partnership with Colquhoun Audio, Bryston has expanded its domestic manufacturing capabilities. With locations in both Peterborough and Dwight, Ontario Canada, Bryston products are sold through the finest residential and commercial A/V dealers worldwide.

About Roon Labs

Roon transforms the experience of browsing music. Artist photos, credits, bios, reviews, lyrics, tour dates, and composers are located automatically, then interconnected by links to build a surfable, searchable digital magazine about your entire music collection.

Roon also links all of your personal files with the millions of tracks available on TIDAL and Qobuz, so you can start with the music you know, then explore and discover new music from the world beyond your collection. Roon runs on most Mac, Windows, and Linux PCs as a server, with an Android or iOS smartphone/tablet used as a control point.
