

FOR IMMEDIATE RELEASE

SAVANT Showcasing Circadian Lighting, Lutron LEAP Integration and more at the 2022 ISE Show in Barcelona

HYANNIS, MASS. May 4th, 2022 — Savant®, a leader in smart home technology, will debut exciting smart home solutions at the 2022 ISE show in Barcelona, Spain, including the international introduction of Lutron LEAP integration, delivering Savant's award-winning Daylight Mode to the worldwide market for the first time.

Savant's Daylight Mode is completely configurable inside the Savant Pro App and delivers dynamic lighting that seamlessly adjusts throughout the day. Daylight Mode requires compatible tunable white fixtures, and with the introduction of Lutron LEAP integration, consumers can now personalize their 24-hour circadian cycle and set dynamic scenes that activate lights to just the right color temperature no matter the time of day or night.

Savant is also announcing a partnership with Black Nova. Black Nova's Smart Design-Keypads feature a luxurious user experience plus exceptional quality and attention to detail. Integration with Black Nova coming late 2022.

Attendees can register for the 2022 ISE [HERE](#).

Savant Smart Lighting Features

Savant Daylight Mode aligns lighting schemes to match the natural circadian progression based on time-of-day. Designed to promote healthy living, Daylight Mode debuted in North America in 2020 and is now available internationally. The Savant app intelligently adjusts for related factors such as geography, time zone and season. Beyond the scientific defaults, users can effortlessly personalize their lighting experience by adjusting timing, intensity, and color temperature settings to perfectly suit their daily habits. Users can turn on and off Daylight Mode in specific rooms of the home from within the Savant App, plus have keypad buttons to instantly override circadian settings for specific task lighting, entertainment settings and more. Savant will be demonstrating Daylight Mode plus their patented Truelmage user experience using Lutron LEAP integration, Lutron's Dali drivers, and Colorbox lighting fixtures.
