

FOR IMMEDIATE RELEASE

## Savant Reintroduces [savantpower.com](https://www.savantpower.com), Focused on all-new Consumer Energy Education

*New on-line simulation showcases the benefits of both whole-home and emergency smart power management*

**HYANNIS, MASS. September 22<sup>nd</sup>, 2022** — Savant Systems, Inc., a leader in smart home and smart power, is introducing all-new resources focused on educating homeowners on the benefits of smart energy, including two new virtual home tours on the all-new [savantpower.com](https://www.savantpower.com) website.

Homeowners who visit the site are taken through the options they have to help manage power in their home, including information on alternative energy sources, battery storage solutions, automatic generators, smarter EV charging, and flexible load management. These solutions are compared to traditional options, including grid-only dependency and the restrictions inherent with wiring for a critical load panel.

Homeowners can choose to enter two simulated home environments, one focused on whole-home power management and one focused on emergency power management:

### **Electrify your Life, Whole-Home**

See how the Savant Power System helps to manage a variety of power resources, including solar, battery and back-up generator power. Experience reduced daily dependency on the power grid and seamless power management during an unplanned grid outage.

### **Manage Emergency Power**

Experience how the Savant Power System manages a grid outage and helps back-up power resources by eliminating non-essential loads and tracking power consumption.

“As the power infrastructure nationwide continues to demonstrate fragility, homeowners are seeking more information and want to understand their options to ensure safe energy resiliency for their families,” said Aaron Gutin, Director of Energy Product Marketing at Savant. “Power management is a new category for most consumers and the resources we have created will help homeowners see how everything works together.”

### **Savant Power System: A Bold Approach to Smart Energy**

The Savant Power System delivers the ultimate energy management solution. Savant’s advanced automated software platform and intuitive app-based user experience make it easy to monitor and control every circuit, optimizing efficiency and reducing costs without compromising comfort and convenience. By combining onsite energy generation, integrated battery storage, generator control, flexible load management, and now powerful EV charging, the Savant Power System delivers complete control of energy assets with the security of grid independence.
