

FOR IMMEDIATE RELEASE

AudioControl Adds Available Dante® Network Connectivity to Director® Model M6800 Amplifier

The world's finest multi-zone ultimate performance matrix amplifier now adds available Dante connectivity, enabling integrators to deliver best quality audio to every zone without being tethered to long analog cable runs.

SEE AUDIOCONTROL AT THE 2023 CEDIA EXPO, BOOTH 2509

Seattle, WA August 29th, 2023 – AudioControl (audiocontrolpro.com) has announced that their award-winning Director Model M6800 multi-zone amplifier is available with Dante digital audio networking capability, continuing the company's unwavering commitment to provide the most advanced, high-performance entertainment solutions for professional A/V installers.

“Last year, we successfully introduced Dante network connectivity as an option on our CM-Series 70-volt Dual Mode amplifiers, providing integrators with a new level of performance for landscape entertainment systems and beyond,” explained Chris Kane, Vice President Of Sales & Marketing at AudioControl. “We are excited to add this amazing technology to the award-winning Director Model M6800, one of our most popular multi-zone amplifiers.”

What is Dante?

Dante is an uncompressed, multi-channel digital media networking technology that moves data over a standard IP network using readily available CAT5e, CAT6 or fiber optic cable with near-zero latency. This technology empowers integrators to deliver best quality audio to every zone without being tethered to costly analog cable runs that are susceptible to signal degradation, especially over longer runs. The AudioControl Director M6800 amplifier with available Dante connectivity is the ultimate multi-zone amplifier for any application including audio over IP.

The AudioControl Director M6800 Amplifier—Designed and Built for CI Professionals

AudioControl's award-winning Director Series amplifiers deliver the ultimate entertainment experience when performance matters. The Director Model M6800 offers the high-power and features integrators must have to provide unrivaled audio performance across any size the music system, including a true, conservatively measured 100 watts/8-Ohms, 200 watts/4-Ohms per channel into 16-channels. The Model M6800 also features a powerful DSP engine that includes graphic and parametric equalization by zone, plus a switching matrix that delivers the highest quality entertainment programming to any zone with unmatched flexibility.

With the Director Model M6800 amplifier, integrators can tailor the sound to each zone based on DSP profiles of leading speaker brands included as part of AudioControl's Sound Partners Program, and then fine-tune the sound based on the acoustic properties of any space. The AudioControl Director Model M6800 can be used as a standalone solution or as part of a complete smart home environment with drivers available for popular 3rd party control systems including Crestron, Savant, RTI and Control 4. Most critically, AudioControl has provided integrators with 16-channels of premium performance from a 2U chassis, conserving critical rack space without compromising sound quality.

Celebrating Over 45 Years

AudioControl has a 45-plus year history of creating award-winning Made in USA products for integrators worldwide and backing them up with superior customer service as well as a 5-year warranty.

The AudioControl Director Model M6800 will become available Q3, 2023.
