AVPro Edge Introduces Heavy Duty MXnet Rack Accessory

The AC-MXNET-1G-R15 vertically organizes up to 15 MXnet 1G encoders to create a professional, clean looking installation while facilitating both proper wire management and critical thermal dissipation.

SIOUX FALLS, S.D., November 30th, 2023 – AVPro Edge (www.avproedge.com) has introduced the AC-MXNET-1G-R15, a 6-RU tall heavy duty rack accessory designed to vertically organize up to 15 MXnet encoders, as well as the AC-MXNET-CBOX. Numbered slots enable integrators to identify each unit quickly and easily—especially useful in large installations. AVPro Edge rack accessories have been engineered for proper ventilation while also positioning each device for effortless wire management.

"This rack accessory perfectly positions most MXnet 1G units for an uncluttered, front-facing display appearance and detailed wire management on the backside," explained Matt Murray, CTO at AVPro Edge. "Though the AC-MXNET-1G-R15 is an accessory, we think that integrators will find that it is practically indispensable for their MXnet installations."

Ease and Efficiency for Integrators

A hook-and-loop metal clasp attaches to each MXnet 1G or AC-MXNET-CBOX chassis and connects the device to the bottom of the AC-MXNET-1G-R15, while a thumbscrew safely secures the top, allowing for rapid removal when required. For the taller AC-MXNET-1G-DANTE-E models, integrators can use the AC-EZRACK-15 for proper rack installation.

AVPro Edge products include a 10-year advance-replacement warranty, providing integrators with peace of mind knowing they have installed a product that has been built to last from a trusted manufacturer committed to the pro A/V channel.
