Savant Expands Smart Home and Power Portfolio with Introduction of Power Storage 50

All-in-one high-density, large capacity battery and inverter can scale to handle electrical services up to 800 Amps

HYANNIS, MASS. October 31st, 2024 — Savant Systems, Inc., a leader in smart home and smart power, has introduced Savant Power Storage 50, an all-in-one high-performance inverter and LFP battery solution that is powerful and safe yet simple to install. Power Storage 50 integrates seamlessly with Savant’s intelligent software and award-winning flexible load management technology to provide the most comprehensive smart energy monitoring, management, and backup solution.

Each inverter and battery houses 50kWh of storage, delivering up to 25kW of continuous power output per battery/inverter stack, making it an ideal solution for residential and light commercial applications. Engineered to back up electrical services greater than 100 Amps, multiple systems can be combined to scale up to 800 Amps for larger applications or to take a structure completely off grid.

“The Power Storage 50 is the answer for larger home and small building owners looking to maximize solar power, lower energy costs and ensure access to clean energy even when the grid goes down,” said Bob Madonna, CEO of Savant. “For installers looking to grow their business, it’s also the perfect complement to our growing suite of easy-to-install smart power solutions that deliver a convenient and energy efficient smart home or building.”

The Power Storage 50’s advanced hardware can be easily installed in less time than competitive solutions. Battery cabinets have been designed for easy side-by-side installation, and the inverter has been engineered so that it can be mounted onto the battery cabinet or separately conserving valuable space for any project.

Pricing for Savant's latest energy storage system (ESS) starts at \$34,000 MSRP with a 10-year warranty, and is eligible for U.S. tax credits, as well as other government subsidies via the Inflation Reduction Act (IRA). To order, customers can simply log on to [savant.com](https://www.savant.com) for a free consultation. A Savant smart home and energy expert will provide information that meets their specific home or business needs and connect them with a local installer.

The Savant Power System, along with the vast lighting, entertainment, security, and comfort portfolios of Savant smart home and GE Lighting, a Savant company, creates the only integrated whole home and energy automation solution that can be controlled by one award-winning software platform and app.

The Savant Power Storage 50 will become available September, 2024.
