

Bullet Train Introduces the Professional Series HDMI Cables

New premium HDMI cables deliver superior shielding, unmatched conductivity, and outstanding durability—making Bullet Train Professional Series the ideal solution for A/V integrators.

SIoux FALLS, S.D., March 25th, 2025 – Bullet Train (bullettraincables.com) has introduced the Professional Series HDMI cables, designed to deliver the performance and durability required by A/V integrators. Professional Series cables are available in lengths ranging from .3 Meters (1 foot) to 5 Meters (16.4 feet).

Bullet Train Professional Series HDMI cables are engineered to the strictest standards, ensuring robust signal integrity and interference rejection. Each of the 19 oxygen-free copper conductors are isolated within Kevlar™-reinforced polymer dielectric insulators that feature multi-layer, end-to-end shielding, effectively suppressing both radiated noise and crosstalk. A durable braided sleeve resists fraying and electrostatic discharge while the proprietary metal headshell, featuring Bullet Train's C-lock design, maximizes contact pressure and prevents deformative mechanical "creep" from impacting the internal conductors for unwavering connectivity. Additionally, each headshell is numbered, making it easy for integrators to identify matching ends across even the most complex installations without the need for time-consuming label-making.

"A/V racks are often a densely populated environment, with hardware and critical wiring housed together in close quarters," explained Aaron Doughten, Product Manager at Bullet Train. "Our new Professional Series HDMI cables meet advanced electromagnetic compliance regulations (EMI/RFI), reducing spurious noise to achieve the cleanest possible signal path. And our exceptional headshell design ensures both maximum contact pressure when inserted into device ports as well as the most effective cable strain relief in the industry."

Bullet Train Professional Series HDMI cables are backed by a lifetime warranty and are available now.

About Bullet Train

A division of AVPro Global Holdings established in 2017, Bullet Train engineers HDMI, USB, and other cable products for the ultimate in reliability and high bandwidth connectivity. All Bullet Train cables are certified by the top standards organization for color science to support AV professionals committed to delivering the best signal quality possible with higher frame rates, enhanced resolution, and perfect color fidelity. Bullet Train cables feature proprietary engineering and are manufactured from the finest materials for precision signal flow, high speed, and reliability. Brought to you by the same designers responsible for the world's most scientifically accurate HDMI test devices, Bullet Train products are future-forward solutions that exceed the demands of the latest digital signal formats. bullettraincables.com

About AVPro Global Holdings, LLC

AVPro Global is a privately held American company headquartered in Sioux Falls, SD, with satellite offices in St. Petersburg, FL, Seattle, WA, a European office in Bratislava, Slovakia, and an office in Shenzhen, China. The AVPro Global audio/video-centric brands - AVPro Edge, AudioControl Pro, Bullet Train, Murideo, and Then Audio – combine their respective strengths to create the fastest-growing AV signal distribution company in the residential and commercial systems integration spaces, perfectly complementing AVPro Global Founder and CEO Jeff Murray's vision, "To be recognized as the best AV signal distribution and control products and services company on the planet." avproglobal.com
