

Bullet Train Introduces the Professional Series USB Cables

New USB 3.2 Gen 2 Type-A to Type-C USB cables deliver optimized connectivity, synchronization, and charging capability—perfect for A/V integrators seeking a best-in-class solution up to 15-meters.

SIoux FALLS, S.D., March 3rd, 2025 – Bullet Train (bullettraincables.com) has introduced the Professional Series USB cables, engineered for high-speed data transfer and reliable power delivery across USB 1.0, 2.0, and 3.x standards. The new lineup includes cable lengths from 1-meter up to 15-meters. The optimized performance, durability, and backward-compatibility make Bullet Train Professional Series USB cables ideal for A/V professionals seeking the best quality for every project.

“Specifying Bullet Train Professional Series USB cables into heavy-use markets such as Collaboration Suites, Office/Boardroom, Education, Mission Critical applications, and more enable integrators to ensure performance and durability from a benchmark-setting solution,” explained Aaron Doughten, Product Manager at Bullet Train. “Our USB cables have been engineered and tested to reliably deliver high-bandwidth signal transfer while accommodating connectivity up to 15-meters.”

Professional Series Cables Up To 15-Meters

To achieve outstanding performance and durability, Bullet Train Professional Series USB cables feature 99.99% oxygen-free copper conductors, ensuring high-conductivity, low-attenuation, and superb corrosion resistance, resulting in long-lasting, precise data transfer. Bullet Train employs precision-machined connectors to ensure secure engagement and withstand a high number of insertion and removal cycles, extending cable life and preserving long-term performance. Bullet Train Professional Series USB cables have been exhaustively tested, including interoperability-verification on over 80 leading-brand devices.

Bullet Train Professional Series USB cables are backed by a lifetime warranty and are available now.
