# AVPro Edge Introduces the STILE App

### *STILE is the ultimate drag-and-drop user experience for easily managing multiple video sources and displays via the MV-41 multi-viewer*

**SIOUX FALLS, S.D., April 2nd, 2025 –** AVPro Edge (www.avproedge.com) has introduced the STILE App, enabling users to intuitively control their AVPro Edge MV-41 multi-viewer processor and everything connected to it. The STILE App facilitates effortless configuration on both iOS and Android devices so that users can switch, route, and configure sources via a clever drag-and-drop interface for ease of operation and flawless performance.

"As video displays exceed 100-inches and laser projectors achieve even larger picture sizes, users have been more inclined than ever before to enjoy multiple video programs simultaneously," explained Matt Murray, CTO at AVPro Edge. "The STILE App and MV-41 multi-viewer enables users to elevate their entertainment experience, enjoying exceptional picture quality and an astonishingly intuitive drag-and-drop app that lets anyone instantly switch layouts, assign inputs, or adjust settings without disruption. AVPro Edge has redefined the multi-viewer experience for every application."

Managing multiple sources and displays has never been easier. STILE gives users total control over their MV-41 multi-viewer, enabling them to quickly swap between inputs and show up to four sources per TV. With seamless integration and an easy setup process, A/V pros can bring added value to each client by customizing their viewing experience without complicated remotes or settings—just tap, drag, and enjoy. Users can also master the STILE App to create their own favorite configurations using a host of layout presets. Homeowners love intuitive tech solutions, and with STILE, every screen and video source all work together within a single app.

**About the AVPro Edge MV-41**
The AVPro Edge MV-41 is a four-input HDMI multi-viewer, delivering as many as four separate HDMI 2.0 video sources simultaneously on any size monitor, television, or projector. The MV-41 offers customized tile configurations with recallable presets, such as a primary picture with a "keep tabs" box in the corner, a quad-view with four equally sized windows, or custom layouts featuring window tiling arrays limited only by the user's imagination. The MV-41 is HDMI 2.0 compliant, with HDCP 2.3, for all four inputs and the solo HDMI output. Sources may include SD, HD, and Ultra HD up to 4K/60 fps and safely be combined into a single image for playback on the dedicated display. AVPro Edge's renowned EDID management eliminates interface challenges, so systems function perfectly every time. The MV-41 can be used as a standalone solution or as part of a smart ecosystem, with input switching controlled by most popular third-party control platforms. Each input on the MV-41 features an HDMI loop-out to provide creative expansion capabilities with additional units or to pass source signals through for broader distribution, through a solution such as an AVPro Edge MXnet ecosystem.

AVPro Edge products feature superior design and manufacturing and are backed by a 10-year advance-replacement warranty, providing integrators with peace of mind knowing they have

installed a product that has been built to last from a trusted manufacturer committed to the pro A/V channel. For more information, visit avproedge.com or call (877) 886-5112.
