

Cleerline Launches Online Configurator for Custom Fiber Patch Cables

Now integrators can use an intuitive web-based configurator to quickly design, and order fiber patch cables tailored to perfectly suit each project.

Missoula, Montana, June 26th, 2025 — The Cleerline Technology Group, market leaders in fiber optic connectivity solutions for commercial and residential technology applications, has introduced a web-based B to B configuration tool to streamline the ordering process for prefabricated fiber patch cables of any length or quantity. Integrators simply select the desired fiber optic cable, connector style, cable length, and any available options from easy drop-down menus to obtain a quote and complete their order. All cables are tested to exceed industry standards prior to shipping.

The Ultimate Fiber Solution for Technology Integrators

Cleerline offers prefabricated patch cables in any length, constructed using their SSF™ or their BendSafe® fibers to significantly improve efficiency on the jobsite. Integrators can choose from multimode or single-mode fiber, add options such as staggered connectors and pull-eyes, making it easier to pull the cables through conduit. Every cable is expertly assembled, polished, and tested to exceed industry standards. Single-ended termination is also available, allowing technicians to snake the unterminated end through constricted spaces, with only one end to terminate on the jobsite. For every network or AV installation, Cleerline makes it easier than ever to get the job done right.

Cleerline continues to set the standard in fiber connectivity for integration pros due to their easy termination, best-in-class strength, and superior bend insensitivity to achieve exceptional long-term reliability.

About Cleerline Technology Group

The Cleerline Technology Group was founded in 2012 as an affiliate of D'Addario & Co by principals Robert D'Addario, Ryan Prentice, and Rick Sant, with headquarters in Missoula, Montana. Through meticulous design and innovation, Cleerline has created a line of premium fiber optic cables and installation tools that deliver unsurpassed performance with best-in-class durability, flexibility, and ease of use. Cleerline SSF™ (Stronger, Safer, Faster-to-terminate) fiber optic cables employ a unique Glass-Glass-Polymer design that can be safely terminated in as little as one minute, establishing a benchmark for professional installers seeking to deliver best performance to their clients. Cleerline fiber optic cables make smart homes and businesses brilliant. cleerline.com
