

RTI Introduces Advanced Base for ISR Remotes

New Optional Base Combines Charging Capability with a Dedicated Wi-Fi Access Point, Three Programmable Scene Buttons, and a Find-My-Remote Feature

SIOUX FALLS, S.D., September 30th, 2025 – RTI, the leading brand of control and automation solutions, has announced that the ISR-AB Advanced Base, the first-ever remote charging base to offer a built-in Wi-Fi access point, programmable control buttons, plus a Find-My-Remote feature, is available now.

In addition to charging RTI's ISR remotes, the Advanced Base provides the most useful new features, such as a dedicated Wi-Fi access point, three fully programmable buttons, and the convenience of a Find-My-Remote feature—simply touch a button on the base to trigger an audible alert from the remote. The ISR-AB features a stylish design suited to any décor. A subtle LED light ring illuminates in set colors, corresponding to different modes of operation. The RTI ISR-AB enables integrators to deliver a customizable smart home experience perfectly suited to every client.

“The ISR-AB Advanced Base is the perfect companion to RTI's ISR-4 or ISR-2 remotes, adding unmatched convenience and elevating the control experience for our users,” explained Pete Baker, Director of Residential Control Sales at RTI. “The built-in 2.4GHz Wi-Fi access point ensures a fast, robust connection for the remotes, and the three programmable soft-touch buttons are ideal for easy control of custom scenes or frequently used room functions—without even lifting the remote off the base. And the Find-My-Remote feature will be a hit with consumers. The ISR-AB represents an opportunity for integrators to add valued features to their RTI smart home solutions.”

RTI's Award-Winning ISR Remotes

The ISR-4 features a brilliant 4-inch high-definition touchscreen that delivers a smartphone-like experience with ample space for cover art, camera feeds, and lighting controls. Customizable soft keys enable scene selection while soft-touch backlit buttons and an intuitive 5-way thumbpad ensure effortless operation.

The ISR-2 balances a vibrant 2.8-inch touchscreen with a numeric keypad for seamless media system control. The ISR-4 and ISR-2 each feature real-time haptic feedback for precise, tactile responsiveness.

Both remotes incorporate advanced Wi-Fi technology for reliable connectivity, built-in accelerometers for instant activation when picked up, and ambient light sensors that automatically adjust display brightness. Smart power management delivers 4-5 days battery life for the ISR-4 and 6-7 days for the ISR-2.

Since 1992, RTI has been at the forefront of innovation in control and automation, transforming spaces into intelligent environments that enhance lifestyle and streamline operations. The comprehensive suite of products and award-winning support services empower integrators to

craft personalized and intuitive control experiences optimized for every project. For more information, visit rticontrol.com or call (877) 886-5112.
