Missoula, Montana — June 15th, 2026 — The Cleerline Technology Group, a market leader in fiber optic connectivity for commercial and residential technology applications, has appointed Robin Roy as Senior Account Manager, overseeing the continued development of Cleerline's distributor network across the United States.

Based in Chattanooga, Tennessee, Roy brings more than 20 years of experience in the commercial and residential AV channels, having demonstrated success in previous roles with distributors and independent sales representative organizations throughout the Atlanta region. During that time, she was introduced to Cleerline solutions and recognized early on that fiber infrastructure would become critical in meeting the growing bandwidth demands of commercial AV applications.

"We are excited to add the experience and skill set that Robin brings to Cleerline," said Ryan Prentice, President of Cleerline. "We are confident in her ability to grow our distributor network while strengthening critical existing relationships across multiple vertical markets throughout the United States."

"The overall capabilities of fiber simply can't be beat, and I am thrilled to come onboard as part of the Cleerline team," said Roy. "Because fiber deployment is still relatively new for many organizations, I look forward to demonstrating how easy it is to implement while helping train sales teams. I can take the mystery out of fiber, giving our customers the confidence they need to deliver the best infrastructure for every client."

About Cleerline Technology Group

Based in Montana with offices throughout the United States, Cleerline manufactures single-mode and multimode fiber optic cables designed to outperform traditional fiber. With our patented SSF™ and BendSafe® technologies, our products deliver superior strength, flexibility, and reliability—bending tighter, handling easier and lasting longer in extreme applications, harsh environments, and dense cable paths. Unlike traditional fiber that can be fragile and prone to break under stress, our patented process reinforces the glass itself to provide industry-leading bend tolerance and durability, establishing a benchmark for professional installers seeking to deliver best performance to their clients. cleerline.com
